MEMORANDUM FOR THE DIRECTOR, CENTRAL INTELLIGENCE

25X1A

1. The following should be noted in comparing the attached recommended draft for a General Order and the skeleton organizational chart with the ones submitted by [redacted]

a. It is inconceivable that Inspection and Security should be under the Executive for Administration. Inspections and audits of financial accounts must be directly under the Director; otherwise, administrative elements will be conducting inspections and audits of their own functions and accounting. A similar objection arises as to approval of security investigations in a large administrative set-up. This was one of the principal reasons for removing Security from under the Executive for Administration in the CIG set-up.

b. Under no circumstances should the General Counsel be under the Executive for Administration, in order to prevent pressure by that individual to influence legal recommendations to the Director. It is obvious that under certain circumstances, dire consequences could possibly result from such a set-up.
